

TECHNICAL ANALYST

Software & AI/ML Developer

SUMMARY OF QUALIFICATIONS

Software Engineering Technology – Artificial Intelligence graduate with a Bachelor’s in Computer Science and hands-on experience delivering public-sector, enterprise, and AI-driven solutions. Proven ability to apply analytical reasoning, written communication, and organizational awareness in Agile government environments. Experienced in Python, Java, C#, NLP/ML models, REST APIs, and SQL, with strong collaboration skills across architects, developers, and stakeholders. Highly aligned with the Ontario Public Service (OPS) values of accountability, service excellence, and continuous improvement.

KEY SKILLS

- **Programming & AI/ML:** Python, Java, C#, C++, SQL, TensorFlow, PyTorch, scikit-learn, spaCy, BERT, Stanza
- **NLP & AI Frameworks:** LangChain, LangGraph, Prompt Scaffolding, Model Evaluation
- **Frontend:** Angular, React, HTML, CSS, JavaScript, Figma
- **Backend & Databases:** ASP.NET, REST APIs, PostgreSQL, SQL Server, SQLite, Azure
- **Data & Analysis:** Data preprocessing, feature engineering, data validation, Power BI
- **QA & Delivery:** Unit Testing, Selenium, Manual Testing, Debugging, Jira
- **Tools & Methods:** Git, Azure DevOps, Eclipse, Visual Studio, Apache Tomcat, Miro, Agile/Scrum
- **Networking & Security:** TCP/IP, DNS, DHCP, VPN, firewalls, VLANs, Windows Server, Linux, encryption

WORK EXPERIENCE

Ministry of Transportation (OPS) | Toronto, ON Jan. 2026 – May 2026

Junior Technical Analyst (Co-op / Contract)

- Worked on an AI/NLP-driven project using BERT, spaCy, and Stanza to extract, analyze, and structure unstructured text data for business insights.
- Applied NLP preprocessing, tokenization, entity recognition, and model fine-tuning to improve accuracy and usability of analytical outputs.
- Retrieved, preprocess, and analyze SQL database data to support backend and analytical functionality.
- Prepared meeting notes, summaries, and communication materials to support coordination across technical and business teams.
- Participated in Agile sprints, architectural discussions, daily stand-ups, and documentation using Git, Azure DevOps, and Jira.
- Assisted teams with organizing and updating documentation, file structures, and internal records to support information management activities within the division.

Ministry of Transportation, (OPS) | Toronto, ON Sept. 2024 – Dec. 2024

Junior Technical Analyst (Co-op / Contract)

- Contributed to enterprise application modernization within OPS by converting legacy reporting logic into maintainable Java modules.
- Developed UI components using HTML/CSS and deploy web applications via Apache Tomcat.
- Extracted and reviewed SQL data to support reporting, data validation, and basic analysis for backend processes.
- Designed and implemented backend reporting services, ensuring scalability, performance, and compliance with OPS standards.
- Created workflow diagrams and process documentation to improve clarity of systems and support modernization efforts.
- Logged and tracked technical issues/tickets, ensuring thorough follow-up and accurate documentation aligned with service expectations.

Developer (Co-op) | Scriptics, Toronto, ON

May 2024 - Aug. 2024

- Assisted in documenting workflows, operational guides, and process diagrams to support process clarity and knowledge sharing.
- Reviewed data and workflows to identify gaps and support reporting improvement initiatives.
- Prepared onboarding documentation, organized files, and supported client teams through clear instructions and structured materials.
- Tracked issues and updates in Jira, helping maintain accurate documentation and version control.
- Coordinated Agile activities, ensuring project documentation remained up to date and accessible.

ACADEMIC PROJECTS

AI Tutor (Conversational Learning Assistant)

- Designed and developed an AI-powered tutoring system using LangGraph and LangChain to manage multi-step reasoning and conversational workflows.
- Implemented prompt scaffolding techniques to guide users through structured learning and problem-solving.
- Managed data storage structures using PostgreSQL for conversation history and metadata organization competency expectations.

Virtual Assistant (NLP & Speech Processing)

- Developed a Python-based voice and text assistant using PyTorch for natural language understanding and speech recognition.
- Collected and organized training data, applying preprocessing and documentation practices.
- Integrated external APIs for real-time weather and news, delivering a conversational AI interface.

AI Cover Letter Generator (MERN Stack)

- Built a full-stack web application using MongoDB, Express, React, and Node.js to generate AI-tailored cover letters.
- Designed and tested REST APIs, optimized frontend responsiveness, and performed manual QA testing..
- Supported frontend and backend integration through clear records of requirements and system behavior.

Personal Finance Tracker (C# ASP.NET)

- Created a secure financial management system using C# ASP.NET and SQL Server.
- Implemented income/expense tracking, unit testing, and query optimization for scalability.

Med-Hub Healthcare System (Team Lead)

- Led an Agile SCRUM team to develop healthcare management software for underserved Ontario communities.
- Designed system architecture, UML diagrams, ERDs, and coordinated sprint execution using Jira.

EDUCATION

Software Engineering Technology - Artificial Intelligence (Co-op)

Sept. 2023 – Dec. 2025

Centennial College, Toronto, ON

4.13/4.5 GPA

Courses: Web Applications Development | Supervised Learning | Mobile App Development | Testing & QA | Web Interface Design | Networking for Developers | Database Concepts (SQL) | Software Systems Design | Cloud Computing

Bachelor of Technology – Computer Science

Aug. 2018 - Nov 2022

Maharshi Dayanand University, Haryana, India

Courses: Computer Science Fundamentals | Database Management Systems | Web Development | OOP | Data Structures and Algorithms | Operating Systems | Networking & Security | Mobile App Development | Artificial Intelligence & Machine Learning | Python | C++
